

LIGHTING A LOCAL COMMUNITY RECREATIONAL PARK

San Miguelito, Panama

GreenStar and our partner, Munifed Energy, traveled to San Miguelito, Panama where we were both able to sponsor the lighting of a local community recreational park with GreenStar LED luminaires. The park had not had adequate nighttime lighting to allow residents to feel safe for over 5 years. Hundreds of residents came out to celebrate the lighting of the park and to thank Mayor Gerald Cumberbatch for helping create a safer community. GreenStar LED and Munifed Energy were touched by the countless number of residents that came and expressed their gratitude for lighting up the park so that their children could play safely.
