The Inspiration

Classic Stone Creations

Classic Stone Creations has been designing, crafting and installing beautiful stone architecture for nearly 10 years. We work with architects, builders, contractors and homeowners to add timeless and distinctive features to private homes and estates as well as public spaces and businesses. The effect our artisans create, whether simple or intricate in design, is always personal and special.

Our offerings range from simple fireplace surrounds to front entrances, columns, balustrades and much more. Our architectural design consultants will handle all the logistics while guiding you on styles and what will work best for your home. You will be so pleased to achieve your desired feel of a Tuscan villa, a French estate, Modernist enclave, or your own original inspiration.

There are many benefits to adding Classic Stone to your home. While adding value and beauty, you are also making a smarter decision than adding a material that deteriorates over time such as stucco or wood. Stone is the original building material and only becomes more beautiful with time. A well done beautiful cast stone fireplace or front entry adds more value, character and interest to your home than any other option. Classic Stone Creations' skilled and professional team of architectural designers and casting artisans, serve clients from conceptual design through installation.

Cast stone has been a prime building material for hundreds of years. The earliest known use of cast stone dates to 12th century. Our products are real cast stone, not plaster or resin based mixtures. Our proprietary mixture includes very fine natural stone aggregates, and hardeners that possess the look and warmth of quarried limestone or Italian travertine, while often being stronger and more durable than cut stone. Because of its strength and natural beauty, cast stone is ideally suited for both interior and exterior applications.

We truly enjoy the opportunity to work one on one with designers, homeowners and builders to create beautiful spaces that will be enjoyed for years to come.

Character & Finish

Inspired by history's exquisitely carved French limestone and Italian travertine, our talented artisans blend fine natural stone aggregates and then craft our stone with variations in hue and texture to create truly unique architectural elements for your home. As in nature, no two stones are exactly alike, and variations in hue and texture are both desired and expected.

Our finished pieces are reflections of stones quarried directly from the earth and chiselled by hand to your specifications. Our clients most often choose a sanded & light distressed finish for their exterior stone architecture. We can also heavily distress our stone if that is a finish more fitting for the desired result. In addition, our clients often choose a secondary polishing technique from our artisans on their interior stone architecture. The result of this alternative technique is a slightly honed stone finish.

Front Entry & Window Surrounds
Opening statements that set the tone

Columns & Balustrade
Highlight the highpoints of your home

Fireplaces & Rangehoods
Add to the heart and soul of
your home with these centerpieces

Decks & Borders

Create a beautiful landscapes with borders around walking paths, gardens, and patios
