

Antimicrobial Coating Proven To Kill Bacteria For Up To 1-Year!

ACP Facility Services now provides a next-generation technology that continuously kills 99.99% of viruses, bacteria, and mold for up to 365 days, with just one application. The solution is water-based, non-toxic and safe for humans, animals, aquatic life, and the environment.

ACP Shield Features

- Bonds to surfaces and inhibits the growth of bacteria
- Functionalized micro-coating actively inhibits microorganisms in the dry state which traditional disinfectants no longer do.
- Up to 365 days of protection
- Durably bonded antimicrobial
- Odorless and colorless post application
- Reduce the everyday costs of disinfecting
