

Hyperbaric therapy utilizes the amazing power of pressurized oxygen.

DURING A RELAXING ONE HOUR SESSION YOUR BODY WILL EXPERIENCE THE FOLLOWING BENEFITS:

- Reduced Inflammation
- Detoxification of cells
- Improved circulation
- Building of new blood vessels
- Up to an 800% increase in stem cell production

THESE BENEFITS CAN RESULT IN:

- Increased mental clarity and alertness
- Strengthened immune system
- Heightened energy and physical performance
- Faster healing of injuries and wounds
- Anti-aging effects
- Smoothing of wrinkles and fine lines
- Prevention for a wide range of conditions such as stroke and Alzheimer's
- Improved sleep
- Decreased anxiety and stress

Case study with SPECT scan imagery

Patient with impaired brain function due to years of chemical toxic exposure. Notice the increased blood (oxygen) flow after the treatments!

BEFORE MILD HBO

AFTER 10 MILD HBO TREATMENTS

Yellow - Normal Green - Less blood Blue & Violet - Severe lack of blood

"Hyperbaric therapy works. After each session I feel a significant boost in my stamina and performance. If you live and breathe in Los Angeles you must visit O2 UP!" -Sebastien Lagree, celebrity trainer and fitness guru

"You get increased oxygenation, decreased swelling, and decreased inflammation all from one treatment. If a drug did this a pharmaceutical company would make quite a bit of money" -Dr. Daniel Rossignol
